

WASTE ACCEPTANCE CRITERIA FOR SPECIAL WASTES

The County of Santa Cruz Buena Department of Public Works owns and operates the Buena Vista Landfill (BVL), located at 1231 Buena Vista Dr., Watsonville, CA 95076. The County of Santa Cruz Department of Public Works Recycling and Solid Waste Section has developed and implemented a Waste Screening and Acceptance Program to assist in preventing hazardous and other prohibited wastes from entering the facility and to establish procedures and acceptance levels for special (nontraditional) solid wastes. The BVL accepts non-hazardous special wastes that have been properly sampled, analyzed, and found to be acceptable for disposal at the landfill or for use as cover at the landfill. The County of Santa Cruz does not accept waste that is defined as hazardous by RCRA and/or CCR Title 22.

PRE-APPROVAL REQUIREMENTS

All special wastes must be pre-approved by The County of Santa Cruz prior to acceptance at the BVL. The County of Santa Cruz requires the completion of a Generator Waste Profile, along with any required analytical results before pre-approval will be granted. It is the responsibility of the generator to certify that the materials for management at BVL are non-hazardous per CCR Title 22 Section 66260. For materials that require laboratory analysis, the generator must provide representative analysis. The County of Santa Cruz site permits do not require any specific testing requirements or sampling frequency for individual waste streams. The California Department of Toxic Substances Control (DTSC) has developed an Information Advisory for clean fill sampling. This Information Advisory can be found at www.DTSC.ca.gov. Contact DTSC for assistance in developing an appropriate sampling plan for your special wastes.

CONTAMINATED SOIL TESTING REQUIREMENTS

The County of Santa Cruz reserves the right to require the generator to perform additional analytical testing. The minimum required sampling frequency is as follows:

Stockpiles	Less than 100 cubic yards:	3 discrete samples.
	100 to 500 cubic yards:	5 discrete samples.
	More than 500 cubic yards:	5 discrete samples plus one additional sample per 250 cubic yards in excess of 500 cubic yards.

Hazardous waste, friable asbestos, radioactive waste, and untreated medical waste (biohazardous or infectious waste) are not allowed for disposal at the BVL

THE FACILITY DOES NOT ACCEPT WASTE THAT IS DEFINED AS HAZARDOUS UNDER RCRA or CCR Title 22.
